

INDEPENDENT DIRECTORS

A measured and pragmatic approach delivered in a very personal way

1. Dependable, independent directors committed to upholding the four pillars of investor protection.
2. Individuals with experience and capacity to ensure your focus is on strategy.
3. Providing specific regulatory expertise through oversight, governance and consultation.

Clearwater offers a deeply personal offering with very much a long-term approach to how we view our relationships. Our high caliber team come from varied financial backgrounds, diverse geographical areas, possess varying industry sector experience and provide a depth of knowledge that complements this client centric mantra.

Our directors have a reputation for providing governance and guidance surrounding the Cayman Islands and British Virgin Islands regulatory environment and its reporting requirements.

Solutions will be delivered with a long-term view with the ability to adapt seamlessly should either strategy or the regulatory environment change. Our directors are personally involved in innovative sectors such as environmental impact and digital/crypto.

We both entertain and encourage innovation within the governance framework. Whilst our directors are continually involved in pioneering and growing sectors the overriding importance of governances always the base line. Regulatory information sharing – both extremely formal and informal is a core pillar of our work culture.

Our primary markets for this offering are the US, Europe & LatAm.
